

Savin Capture & Distribution Solutions

From major corporations and government agencies to small businesses, workers today face the difficult task of managing enormous quantities of information between global office locations, as well as sharing this information with clients. While technology has increased the speed of document transmission, it has also increased the amount of information to be managed.

Savin Document Solutions and Services helps you leverage technology to improve your document management efforts. With a range of flexible Capture and Distribution solutions, Savin can help your organization increase productivity, maximize efficiency, ensure accuracy and safeguard important company documents.

Scan, Share and Distribute Documents

Savin has years of experience developing tested, proven Capture and Distribution solutions. Particularly helpful for the legal, healthcare and financial industries, Savin Capture and Distribution solutions help companies convert paper-intensive processes to digital workflows for efficient, electronic distribution. Work with Savin to create a user-friendly, secure document management system that promotes collaboration.

Industry Leading Solutions

Through close relationships with industry leaders, such as Documentum®, Captaris, Interwoven®, Stellant™, Captiva, Omtool™, nQueue® and OpenText, Savin solutions integrate seamlessly with proven document management systems you currently have in place.

User-friendly Interfaces

Intuitive, easy-to-use interfaces increase the rate of end-user adoption for Savin solutions. In addition, Savin partners with leading vendors so users can continue working with the interfaces they are accustomed to, reducing the need for additional training.

Streamlined Business Scanning

Savin solutions leverage and extend the capability of multi-functional products by offering network scanning software that eliminates the need for multiple desktop devices. These solutions convert paper documents and incoming faxes into digital files for streamlined distribution to various network resources.

Integrated Workflow

Savin solutions are compatible with your existing corporate e-mail and local address books, including Microsoft® Outlook®/Exchange®, Lotus Notes® Domino® and LDAP/LDAPS/SMTP/SMTS/POP3 protocols.

Single Point of Management

Savin offers server-based solutions that facilitate device management from a central location. Network administrators use server-based controls to extend or limit user features, including scan settings, resolution, color and file format. Centralized management tools display the total number of multi-functional products registered on the server with visual status indicators for each connected device.

Enterprise-level Solutions

Savin's enterprise-level document scanning and routing solutions for medium- to large-sized companies eliminate overnight courier needs and faxing and reduce document storage and handling costs.

Flexible Options

In addition to server-based solutions, Savin supports the industry's first serverless scanning and routing solution for companies that lack IT infrastructure or IT staffing. Providing enterprise document scanning and routing directly on multi-functional products, serverless scanning is part of a new platform concept developed to deliver advanced functionality at an affordable price and fast ROI.

Document Security

Savin Capture and Distribution solutions support password protection, 128-bit encryption and network log-in authentication to integrate directly with your network security scheme. Activity tracking can also report on who used a device, what they did, where files were sent and when an event took place. In addition, customized authentication support is provided for LDAP/ LDAPS and NDS.

Scalability

Whether you're a small company with 10 users, a workgroup of 25 users or a large-scale enterprise, Savin solutions accommodate one to hundreds of devices, allowing your operations to scale as needed.

PARTNER SOLUTIONS

- Documentum®
- FileNet®
- Hummingbird® DM 6
- Interwoven® WorkSite™
- LiveLink™
- NSi AutoStore™
- Kofax®
- Omtool™ AccuRoute®
- Stellent™

E-mail and Address Book Support

Savin Capture and Distribution solutions support LDAP directory service allowing you to access unlimited addresses from your e-mail system through your global address book. LDAP support also relieves the administrative burden of pre-registering e-mail addresses as changes to your e-mail server are reflected instantly on all your multi-functional products.

Global Reach

Savin multi-functional products and embedded solutions enable one-touch distribution of documents to multiple worldwide locations.

Flexible Platform

Savin's flexible technology platform ensures compatibility with your existing systems and applications. Plug-ins and frameworks extend the benefits of Savin solutions by integrating with a wide range of content management software for additional capabilities.

Services & Support

Savin software services include versioning, bug fixes and patches to support Savin-installed software. Additionally, Savin's trusted support team delivers expert help desk assistance and field visits for Savin hardware.

Fully-Integrated Applications

Savin offers industry-leading middleware that integrates with existing mission critical applications to simplify and improve document workflow. Integration applies not only to Savin devices and software but also to third-party hardware and software.

Dedicated to fulfilling the needs of a wide array of workplace configurations, Savin can tailor solutions to meet specific requirements based on company size, IT policies and existing architecture, design requirements and workflow complexity.

Savin Capture and Distribution solutions deliver these important benefits:

- Convert paper documents to digital formats to reduce paper volume, save time and eliminate manual filing and retrieval
- Reduce or eliminate mail delivery costs
- Server-based solutions simplify management tasks and enhance network security
- Improve response time through rapid distribution of time-sensitive documents
- Dramatically reduce physical storage costs and floor space allocation through electronic formatting
- Automatically scan a wide range of paper sizes and types
- Convert paper documents to a variety of electronic formats, including PDF, JPEG, TIFF, TIFF-F and PNG
- Compatibility with pre-existing software and hardware eliminates the need to re-train users

About The Document Solutions & Services Division (DSS)
